

Home Brought Stability..!

Saygonda and wife Rezabai Ambe, residents of Sagroli in Biloli taluka of Nanded district. The couple have 3 daughters. They both have to work every day on daily wages to survive the family. Everything, whatever was being earned was spent on everyday needs of the family. They

were living in a hut constructed with tin shade and agricultural waste mixed with mud. They had to repair it before the onset of monsoon every year. So, couldn't get wages of 4-5 days during repairing. The hut was so much weak, so they had to keep elder daughter with two younger sisters at home. So, they couldn't attend school many times. They were facing problem of rats, insects, etc. They always dream to have a pucca home at their own. One day Saygonda came to know about the Habitat project and contacted SSM. He was provided with all the information, terms and conditions. After his acceptance and the documentation procedure, his loan was sanctioned. He started the construction work on his own land. The couple worked on the site and constructed a home of two rooms, bathroom and toilet. SSM paid the amount of Rs. 25000/- in two installments, first at the time of basement and second at the time of roofing. They also invested Rs. 25000/- from their savings and the dream came true. Now there is no problem of insects or rats, children can attend school every day, no need to repair it every year, health status increased because of toilet and bathroom attached to home and many more with happiness. They are punctual about repayment. They happily say, now we can build future of our children too.
